**Our office is based in Newport, set in the heart of Shropshire, benefiting from close proximity to major road and rail links.**

As a main agent and approved contractor, for the largest manufacturers of metal, tile effect roofing in the UK, and the leading lightweight steel framework designers and manufacturers in the UK, the majority of our business is generated from that long standing position.

We have developed extensive experience, ranging from domestic scale Flat to Pitch conversions, through to large scale commercial projects. Earning us a place on a number of authorised, approved lists with county councils, housing associations, and contractors nationwide.

**All materials used in our Flat to Pitch projects are:**

- **Lightweight, with industrial strength**
- **Fixed from a 5 degree pitch, to vertical**
- **Available in various profiles and colours**

**We also provide Liquid Waterproofing Systems for both existing building refurbishment and new builds. Utilising advanced polyurethane technology for Flat Roofs, Walkways and Balconies, the benefits include:**

- **Tough seamless membrane**
- **Resistant to ponding water and foot traffic**
- **Extensive range of product guarantees from ten to twenty five years**

Specialising in Flat to Pitch conversions, DJC Lightweight Roofing Ltd strives to source only the best materials and products currently available within the industry.

Our Flat to Pitch conversions deliver a number of major benefits, which include,

- Water is removed from the roof with appropriate drainage.
- Enhances thermal performance and energy efficiency.
- Increases the asset value of the building.
- Eliminates flat roof repair and maintenance costs.
- Improves security as the flat roof invites burglary and vandalism.
- Dramatically improves the aesthetic value.

Successfully satisfying our client's specific requirements, our products, materials and services include, but are not limited to:

- Britmet Tileform
- Datum Systems
- Ash and Lacy
- Centaur Technologies

**Manufacturers Products and Services are guaranteed for up to forty years**

### **Liquid Waterproofing Systems -**

The systems utilise advanced polyurethane technology, that is extremely durable, low odour, seamless and cost effective. Reinforced with a glass fibre mat, the tough membrane is resistant to ponding water and foot traffic. Ideal for Flat Roofs, Walkways and Balconies, the systems provide a ten to twenty five year product guarantee. Applied straight over existing asphalt or felt roofs, the systems are applied cold, eliminating the Hot Works process and associated fire risks and control measures.
